PROFESSIONAL SUMMARY

Dynamic and results-driven Senior Software Engineer with over 8 years of experience designing, building, and scaling robust web applications and data architecture. Proven expertise in migrating legacy monoliths to high-performance microservices, optimizing complex database queries, and leading cross-functional engineering teams. Adept at balancing technical excellence with business goals to deliver scalable, secure, and user-centric software solutions.

CORE COMPETENCIES

Backend Development: Node.js, PHP (Laravel, Symfony), Python, Go

Frontend Technologies: React, TypeScript, Next.js, HTML5/CSS3

Database Architecture: MySQL, PostgreSQL, MongoDB, Redis, SQL Optimization

Cloud & DevOps: AWS (S3, EC2, Lambda), Docker, Kubernetes, CI/CD

Testing & QA: Jest, PHPUnit, Pyre Static Checking, Functional Testing

Methodologies: Agile/Scrum, System Architecture, API Design (REST/GraphQL)

PROFESSIONAL EXPERIENCE

Senior Software Engineer — NovaTech Solutions *(Enterprise SaaS Platform)*

January 2023 – Present

- **Architected and executed the strategic migration** of a core project management application from Node.js to a highly optimized PHP (Laravel) backend, improving API response times by **35%** and reducing server overhead costs by **20%**.
- **Engineered scalable data models** using MySQL and PostgreSQL, writing complex relational queries and fine-tuning indexing strategies that reduced database load during peak traffic hours by **40%**.
- **Led a cross-functional team of 5 engineers** to build an AI-powered recruitment module, integrating low-latency machine learning APIs to automate high-volume candidate screening workflows and dashboard analytics.
- **Established strict code quality standards** by embedding automated static analysis tools (Pyre) and comprehensive functional testing suites into the deployment pipeline, successfully lowering production bugs by **25%**.

Software Engineer II — Apex Data Systems *(FinTech Platform)*

June 2020 – December 2022

- **Developed and maintained critical microservices** using Node.js and Express, safely handling over 10 million daily API requests with an established 99.9% uptime record.
- **Designed and implemented an automated email notification system** featuring robust error-handling, failover mechanisms, and customized test suites to comprehensively capture expected vs. actual delivery metrics.
- **Optimized legacy MySQL database schemas**, refactoring inefficient query loops and configuring Redis caching layers to boost overall system application throughput.
- **Collaborated closely with Product and Design teams** to break down abstract functional specifications into production-ready software components.

- **Built and deployed responsive web applications** utilizing PHP, JavaScript, and MySQL for a diverse portfolio of consumer-facing e-commerce brands.
- **Integrated third-party APIs** for transactional payment gateways (Stripe, PayPal) and fulfillment logistics tracking, ensuring seamless and secure checkouts.
- **Authored comprehensive automated unit and functional test cases** to guarantee cross-browser environment compatibility and application stability.

KEY PROJECTS

AI-Powered Recruiter Dashboard

Open Source / Internal

- Designed the full-stack architecture for an intelligent talent acquisition application. Implemented strict automated functional testing for the primary data dashboard, tracking real-time telemetry metrics and engineering graceful fail-safes for pipeline delivery anomalies.

Enterprise Project Management Engine

NovaTech Internal

- Spearheaded a performance-driven architectural rewrite of a legacy collaboration tool, focusing heavily on memory optimization, object relationships, and clean database normalization. Prepared technical onboarding video walkthroughs to seamlessly bridge the knowledge gap for incoming engineers.

EDUCATION

Bachelor of Science in Computer Science
State University, California

May 2018

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Oracle Certified Professional: MySQL Database Administrator
